# NISHANT JHA

Software Developer

9142198460 | jhanishant985@gmail.com| Nishantjha72 | Nishantjha72 | Nishantjha

## Summary

Full-Stack Developer with 6+ Months of experience in the Full stack, RESTful API development, and microservices architecture, including enterprise integration using Boomi. Proficient in building responsive front-ends with React.js and scalable backend services using Node.js , .net , .netcore , Express.js, MySQL, and MongoDB. Strong problem-solving foundation with 800+ DSA problems solved on LeetCode and a 1600+ contest rating.

## Professional Experience

Modegenics Software Solutions — Software Developer Intern — Greater Noida, UP | July 2026 – Present

- Resolved 30+ tickets for the engineering team in the first month, recognized with the "Best Intern of the Month" award 1 Times among a cohort of 4 interns for performance and reliability.
- Engineered and refined prompts for an AI model integration, improving response accuracy by 24% and achieving a 95% correct response rate in production.
- Debugged and resolved a critical text-highlighting issue in PDF rendering by designing and implementing a custom search algorithm, improving in-document search and highlight accuracy.

TGH Software Solution — Associate Software Developer — Noida , UP | Apr 2026 - June 2026

- Developed responsive, user-friendly web interfaces using React.js, HTML5, CSS3, and JavaScript, improving page load speed by 24%.
- Wokred With The senior developer and assist them to develop modern backend system using .net core Framework.
- Gained hands-on experience working in Agile sprints, participating in sprint planning, daily stand-ups, and retrospectives as part of a collaborative development team.
- Built foundational expertise in enterprise integration development on the Boomi platform, configuring data flows and sync processes between systems , gained experience on building scalable backend API's.

## Project

ArenaForage — Esports Tournament Management Platform — React.js, C# , Dotnet , PostgreSQL, JWT | GitHub | Live

- Founded and independently built a full-stack platform solving trust and safety issues in online esports tournaments, acting as a verified middle layer between competing teams and tournament organizers to prevent scams and cheating.
- Designed and developed the platform end-to-end using React.js, Node.js, Express.js, and PostgreSQL, architecting a scalable relational schema to support tournament, team, and user data.
- Implemented secure JWT-based authentication and role-based access to protect user accounts and ensure fair, verified participation across tournaments.
- Currently serving 1,000+ registered users with 100+ active monthly users, independently managing full product lifecycle — development, deployment, and iteration.

Attendo - Employee Management System — React.js, Vite, Tailwind CSS, Node.js, Express, MongoDB, OpenCV.js | GitHub | Live

- Developed a face-recognition-based attendance system using the MERN stack (MongoDB, Express.js, React.js, Node.js), enabling secure and automated employee authentication.
- Integrated OpenCV.js for real-time facial detection and recognition, achieving 90%+ authentication accuracy in production use.
- Designed and implemented RESTful APIs with full CRUD operations, optimizing database schemas for efficient querying, data integrity, and reporting.

Promos - Social Media Platform — React.js, Node.js, Express, Mysql | GitHub | Live

- Built a social platform connecting promoters with clients seeking social media promotion, enabling role-based access control for promoters, clients, and admins.
- Implemented secure authentication using JWT and OAuth, ensuring safe, verified access across user roles.
- Designed and integrated a machine learning-based matching algorithm to pair clients with the most suitable promotion platform based on requirements, improving client retention and campaign outcomes.
- Developed secure RESTful APIs with bcrypt encryption and NodeMailer-based email services for account verification and notifications.

## Technical Skills

Languages: C, C++, JavaScript, Python
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap , Figma
Backend: Node.js, Express.js, REST API, Django , Microservices, MVC
Databases: MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, AWS, Boomi, Postman, JWT, OAuth
Concepts: Agile Methodology, Cloud Computing, Machine Learning, Database Normalization , Schema Design , System Design

## Education

Meerut Institute of Technology, AKTU | B.Tech, Computer Science (AI & ML) | Meerut, UP — 2022 - 2026
Marwari College, Bhagalpur | Class 12 (PCM) — 71.6% — 2020 - 2022
MVHS Bharatsheela, Banka | Class 10 — 78.6% — 2019 - 2020

## Achievements and certification

1. Solved 800+ Data Structures & Algorithms problems on LeetCode, achieving a 1600+ contest rating and ranking in the Top 3000 globally in Biweekly Contest 178.
2. Secured 2nd Prize in a college-level Hackathon, competing against multiple teams for innovative technical solutions.
3. Certified - AWS Cloud Practitioner — Amazon Web Services (via AWS Skill Builder/SimuLearn)
